Ryan Berrington 2/5  12 years
Curtis Burt 2/5  13 years
Travis Holdsworth 9/5  13 years

Happy Birthday to all..................

Birthday Facts

- Since your last birthday 31,536,000 seconds have passed.
- In the past year your hair will most likely have grown 12 cm and your nail about 4 cm.
- Your heart beats at a rate of around 72 to 80 beats per minute - since your last birthday it will have beat about 42,075,900 times.
- You breath at a rate of about 30 breaths per minute, so, since your last birthday you have taken approximately 15,768,000 breaths.
- The volume of blood in your body is approximately 5 litres. The heart pumps about 280 litres of blood around your body every hour - that’s 2,688,000 litres per year!
- World population has grown by around 76,570,430 since your last birthday. In the time it takes you to read this another five babies will have been born.
- If you counted 24 hours a day, you would be over 31,000 years old when you reach one trillion!
- More people celebrate their birthdays in August than in any other month (about 9% of all people). The two other months that rate high for birthdays are July and September.
- The least common birth date is May 22nd.
- Did you also know you can have one "Golden Birthday"? From age 1-31, a person encounters his/her "Golden Birthday" one time only: On the day in which their age matched the day of their birth. Thus, if you were born on March 15, your 'golden' birthday would be when you turn 15.

Wednesday week 10 of last term we trialled our first 'Birthday Party' lunchtime games held in the activity room. I invited all students that had celebrated a birthday during the first term. We played pass the parcel, pin the tail on the donkey and musical chairs with a mix of all year levels participating, original I know but they all hold a special place in the life of a child, big or small. The birthday party ended with singing 'Happy Birthday' and birthday cake of course. Thank you to all those students who were brave enough to attend.

Kerry Crowden - CPSW
